

REMARKS

Applicants wish to thank the Examiner for the courtesy of the telephone interview with Marc Rossi to discuss the decision by the Board of Appeals.

Claim 1 has been amended to remove the phrase "at least". It is now believed that the rejection under 35 USC 112, first paragraph is overcome.

Applicants do not intend to limit their claim by this amendment to only cover a stabilized white-light-emitting OLED device that has only two light emitting layers. The Board of Appeals has recognized that the specification clearly would enable a person skilled in the art to use three light emitting layers. A question of whether the claim can cover more than three light emitting layers can be determined if the specification includes enough detail to convince a person of skill in the art that the inventors possessed the invention and to enable such a person to make and use the invention without undue experimentation.

Claims 3-4 depend on claim 1 and should be allowed along with it. The rejection under 35 USC 103 of the remaining claims 5-20 was overturned by the Board of Appeals.

It is believed that these changes now make the claims clear and definite and, if there are any problems with these changes, Applicants' attorney would appreciate a telephone call. Accordingly, this application is believed to be in condition for allowance, the notice of which is respectfully requested.

Respectfully submitted,
